Avnish Dwivedi

Senior DevOps & Cloud Engineer | Kubernetes, GitOps, AWS, Platform Engineering

avnishkumardwivedi858@gmail.com +91 9424029783 Portfolio LinkedIn GitHub

PROFESSIONAL SUMMARY

Senior DevOps & Cloud Engineer with 6+ years of experience designing, automating, and operating scalable cloud infrastructure for SaaS and FinTech platforms. Strong expertise in AWS, Kubernetes, Terraform, CI/CD, GitOps, Linux, and production operations with hands-on experience managing highly available distributed systems in fast-paced environments.
Proven track record in infrastructure automation, platform reliability, disaster recovery, cloud cost optimization, and Kubernetes-based deployments. Reduced cloud infrastructure costs by $40K/month, implemented Active-Active DR architectures, and built secure, scalable platforms supporting mission-critical workloads.
Experienced building scalable AI-powered cloud infrastructure and automation platforms using Kubernetes, Terraform, AWS, and GitOps practices.
Experienced with GitHub Actions, Jenkins, monitoring systems, Infrastructure as Code, and production troubleshooting. Passionate about platform engineering, automation, and building reliable developer infrastructure in agile startup environments.

WORK EXPERIENCE

Senior DevOps Engineer, *nitor infotech* 02/2026 – Present
• Managed enterprise-scale production infrastructure for a Visa client with focus on reliability, scalability, security, and operational excellence.
• Automated infrastructure provisioning and deployment workflows using Terraform, Kubernetes, CI/CD pipelines, and Infrastructure as Code practices.
• Led production troubleshooting, root cause analysis (RCA), incident response, and performance optimization for mission-critical systems.
• Improved infrastructure efficiency and reduced cloud costs by approximately $40,000/month through right-sizing, cleanup automation, and optimization initiatives.
• Designed and implemented Active-Active Disaster Recovery architecture to improve business continuity and failover resilience.

DevOps Engineer, *OnceHub* 01/2022 – 02/2026
DevOps Engineer — OnceHub
• Managed and optimized AWS production infrastructure including EC2, EKS, RDS, S3, IAM, ALB, Route53, and CloudWatch for high-traffic SaaS applications.
• Deployed and orchestrated containerized workloads on Kubernetes (EKS), improving scalability, deployment reliability, and operational efficiency.
• Built and maintained CI/CD pipelines using GitLab CI, GoCD, GitHub Actions, and automation workflows for multi-environment deployments.
• Implemented Infrastructure as Code using Terraform and CloudFormation for repeatable, version-controlled infrastructure provisioning.
• Managed Linux production servers including patching, troubleshooting, access control, storage management, and performance optimization.
• Configured VPC networking, NAT gateways, subnets, route tables, security groups, and load balancers for secure and scalable cloud environments.
• Collaborated with engineering and product teams in agile environments to improve deployment velocity and platform reliability.
• Implemented monitoring, alerting, and logging using Prometheus, Grafana, and CloudWatch to improve observability and reduce incident response time.

DevOps Specialist, Freelance, *myGINNE, DevOps Specialist, Freelance* 01/2019 – 12/2021
• Built and operated secure AWS and GCP infrastructure for FinTech and SaaS workloads
• Designed highly available architectures using EC2, load balancers, VPCs, and managed databases
• Implemented CI/CD pipelines using GitLab CI for zero-downtime deployments
• Performed Linux server administration including patching, firewall configuration, user management, and incident response
• Implemented monitoring, logging, and alerting for production systems

EDUCATION

Information Technology, *RGPV, BTech* 06/2018 – 05/2022
Bhopal

CORE SKILLS

- **Cloud:** AWS | GCP | Azure | DigitalOcean
- **Infrastructure as Code:** – Terraform | Ansible | CloudFormation
- **Containerization:** – Docker | Kubernetes (EKS, AKS, GKE) | Helm Charts
- **CI/CD:** GitHub Actions, Jenkins, GitLab CI, GoCD, ArgoCD, GitOps
- **Monitoring:** – Prometheus | Grafana | Splunk | CloudWatch
- **AWS Networking:** VPC, Subnets, Route Tables, NAT, Internet Gateway, VPN, Load Balancers, Route53
- **TechStack:** – Python | Bash | Node.js | React | OpenAI | Gemini | AWS Bedrock | Langflow
- **Security:** IAM, RBAC, Secrets Manager, SSM, Encryption, Security Groups, Network Policies, Vulnerability Management
- **Production Operations:** Incident Response, RCA, High Availability, Scalability, Reliability Engineering, Performance Optimization

AWARDS

Pioneer Catalyst (Three Times), *OnceHub*
- Recognized twice as Employee of the Month and once Pioneer Catalyst for delivering innovative solutions that improved operational efficiency and drove significant cost savings

All India Hackathon Runner-up
- Participated in numerous hackathons, culminating in selection for a national-level competition organized by MHRD.

KEY PROJECTS

genops.in Infrastructure Automation Tool, *(75% faster provisioning)*
- Developed a Terraform-based automation tool enabling developers to self-provision infrastructure, cutting provisioning time by 75%.

MeetingStanIn.com, *AI-powered meeting assistant deployed on AWS using Bedrock, OpenAI, and Langflow.*

CERTIFICATIONS

AWS Certified Solutions Architect - Associate | Security Best Practices certified | Google Cloud Associate Cloud Engineer
